

thirteen points of superiority — the reasons Gaylord Holsters
are "Preferred By The Experts."

1. Faster than the fastest!
2. Designed for "Directional Draw"
3. Molded to your gun
4. Better concealment
5. Designed to provide a better, faster shooting grip
6. Lighter in weight
7. Far more comfortable, whether sitting, walking or riding
8. Less wear on clothing
9. Nylon sewn, far stronger and longer lasting
10. Finest quality leathers
11. Only commercial "boned" holster
12. Heaviest and finest quality snaps and findings
13. Twentieth century design with nineteenth century craftsmanship

DOLLAR FOR DOLLAR — YOUR GUN IN A GAYLORD HOLSTER
IS THE CHEAPEST LIFE INSURANCE YOU CAN BUY!"

Chic Gaylord
312 WEST 47th STREET
NEW YORK 36, NEW YORK

"Preferred By The Experts"

STATEMENT OF POLICY

Everything we use in today's world is streamlined. Twentieth Century design is synonymous with comfort, compactness, speed and practicality. Yet holsters have not changed since men rode horseback. We have long felt there has been a crying need for modern holsters to fill modern requirements. These requirements were crystalized in many of the questions brought to our custom holster shop by Federal agents, police officers, sportsmen, shopkeepers and expert shooters.

A jeweler asked, "How can I be effectively armed when I'm in shirt sleeves behind a counter?" — Our 8-Ball Side Pocket Holster was designed to answer his question.

One sportsman wrote, "I have an 8 $\frac{3}{8}$ " Magnum revolver. I can't draw it from any of the few holsters made for it. Can you make me a holster in which I can carry my "Mag" comfortably, sit down, yet draw my gun quickly in an emergency?" — Our Dragoon Holster, exclusively made for heavy revolvers, solved his problem.

A police officer said, "I have a small off-duty gun. I'd like to be able to carry it with concealment, yet be able to put it on or take it off without having to strip my belt." — The answer to this problem was the very popular and low priced Hold-Out Inside Holster.

An expert shooter said, "I have a Combat Masterpiece and I cannot find a holster that doesn't get the rear sights out of adjustment and end up damaged." — Our Shooting Star has been designed to protect the rear sights and has been made extra wide at the bottom to accommodate the high front sights.

The Federal agent required a holster that provided him with concealment, speed and comfort. — The Thunderbolt Holster has all three!

For many years as custom holster makers we have been solving these and many other problems. Today as manufacturers we will continue to design for your gun carrying needs and to welcome any new problems and suggestions.

We refuse to manufacture any holster that we ourselves would not be willing to stake our lives on in an emergency. It is this policy that has made Chic Gaylord Holsters preferred by the experts.

Chic Gaylord

This holster is made for small frame revolvers having 2" barrels. COLT's .38 Detective Special, Cobra, Police Positive, Banker's Special, and SMITH & WESSON's Chief's Special.

Colt's .38 Detective Special
shown in holster

T-1 TREASURY THUNDERBOLT

(Patent Pending)

The Thunderbolt was especially designed for agents of the U. S. Treasury Department's Bureau of Narcotics. It is unquestionably the fastest concealment holster made for small frame 2" barrel revolvers. The Thunderbolt was designed to stress the utmost in speed, concealment, comfort and safety. The interior of this holster has been boned to increase the speed of draw. The Thunderbolt has been moulded to the shape of the gun to eliminate any excess bulk.

The Thunderbolt is made to be worn on a 1 $\frac{1}{2}$ " belt.

FASTER THAN THE FASTEST

(From "The Hitch Is In The Holster" by Lucian Cary in the April, 1955 issue of TRUE The Man's Magazine.)

"Chic Gaylord makes holsters for fast draw designed to suit the individual. He specializes in holsters for peace officers and members of the Treasury Department's narcotics squad who must carry a gun so it is concealed and yet is ready for a fast draw. He experiments endlessly in his shop . . ."

R-1 BABY HI-RISE

Made for the following revolvers having 2" barrels: COLT's .38 Detective Special, Banker's Special, Police Positive, SMITH & WESSON's .38 Chief's Special, Terrier, Regulation Police, S&W's .32 Hand Ejector.

Colt's Detective Special shown in holster

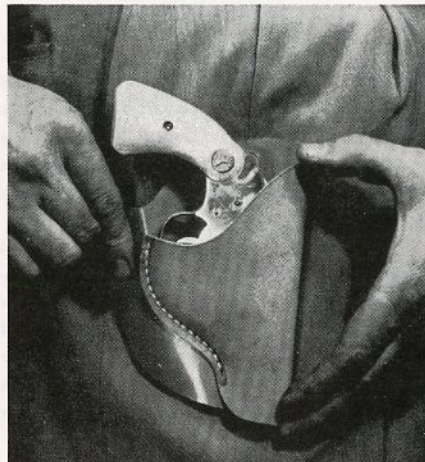

The Hi-Rise holsters were designed to stress comfort, concealment and to minimize the wear on linings of suit-coats and jackets. All excess bulk has been eliminated by this one-piece construction. They are formed to the shape of the gun and double sewn with heavy nylon cord. The release on the retaining strap is both short and fast. These holsters may be worn directly over the hip-bone on either side of the body. The Hi-Rise should be worn on a 1½" belt. The Baby Hi-Rise is worn on a 1" belt. The latter holster may be obtained with a super-safe snap-loop for a 1" belt and can be snapped on or off the belt in a jiffy.

R-2 HI-RISE

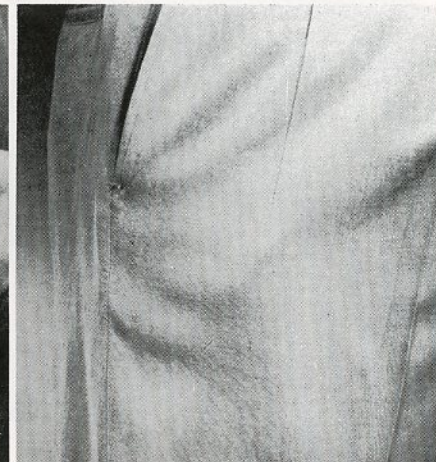

This holster is made for medium frame revolvers having 4" barrels. COLT's Official Police, Marshal, and SMITH & WESSON's Military & Police.

Colt's Marshal shown in holster

Colt's Detective Special shown in holster

(Patent Pending)

C-1 8-BALL

This side-pocket holster for small guns has become the favorite of detectives, bankers, jewelers, shopkeepers and persons wishing to carry a concealed weapon in hot weather, or who desire to be unobtrusively armed while in shirt-sleeves. The 8-Ball protects both the gun and the trousers' pocket. The gun can be drawn with amazing speed while the 8-Ball remains in the side pocket. Many police officers who desire the added insurance of "toting" an extra gun, slip their small off-duty weapon into a left-handed 8-Ball in the side pocket of their uniform trousers for emergencies.

This holster is made for the following revolvers having 2" barrels: COLT's .38 Detective Special, Cobra, Banker's Special, Police Positive, SMITH & WESSON's .38 Chief's Special, Centennial Model, Terrier, Regulation Police, .32 Hand Ejector.

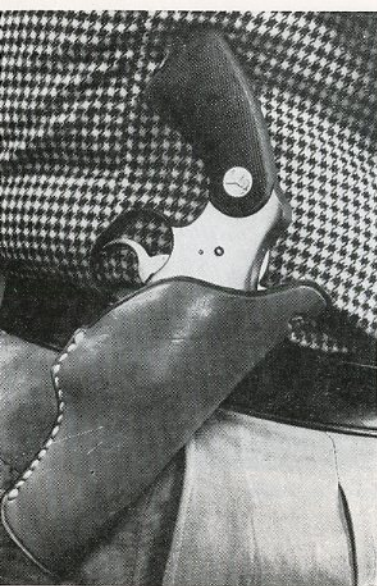

Another 8-Ball Holster model #C-2, is made for most small .7mm, .9mm, .32 and .380 automatic pistols.

Mr. Shelley Braverman, distinguished firearms consultant and Editor-Publisher of THE FIREARMS DIRECTORY wrote:

"Dear Chic: It is now a year that I have carried one of your EIGHT-BALLS in my side pocket, and it is time that you were told about it. After thirty years experience with holsters the simplest comment I can make about the EIGHT-BALL is that it is the best holster for its purpose obtainable.

There is nothing in the world that has been brought to my attention, to equal it. With best personal regards.

SHELLEY BRAVERMAN"

S-1 FEDERAL SPEED SCABBARD

The Federal Speed Scabbard was especially designed to provide the utmost in speed and comfort for those wishing to carry police service revolvers in concealment. This scabbard has been formed to the gun to eliminate excess bulk and its interior has been boned to increase the speed of draw.

Despite the fact that the Federal Speed Scabbard was designed to be a concealment rig, in tests it has proved to be far faster than any other holster, regardless of type. With a little practice, it is possible for almost anybody to draw a revolver from this scabbard and fire a well-placed shot within a total elapsed time of $\frac{1}{4}$ of a second!

This holster is made to be worn on a $1\frac{1}{2}$ " belt.

Colt's Marshal shown in scabbard

Both scabbards are made for medium frame revolvers having 4" barrels.
COLT's *Official Police*, *Marshal*, and SMITH & WESSON's *Military & Police*.

FASTER THAN THE FASTEST

S-2 FEDERAL SAFETY SCABBARD

The Federal Safety Scabbard is the safest fast holster — and the fastest safe holster obtainable. It was designed for men wishing to carry the regulation 4" barrel police revolver in concealment and with maximum comfort. A "Directional Draw" scabbard, its design features a short, fast release that permits an exceptionally fast draw. All extra bulk has been eliminated. The Federal Safety Scabbard has been formed to the gun, boned on the inside to increase the speed of draw and double sewn with heavy nylon cord.

This scabbard is made to be worn on a $1\frac{1}{2}$ " belt.

Colt's *Official Police* shown in scabbard

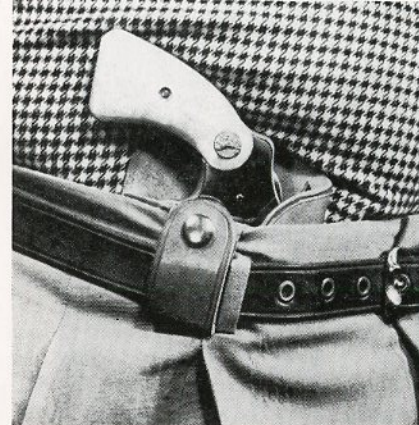

D-2 HOLD-OUT

Made for small frame revolvers with 2" barrels. COLT'S .38 *Detective Special*, *Cobra*, *Police Positive*, *Banker's Special*, SMITH & WESSON'S *Chief's Special*, *Centennial Model*, *Terrier*, and .32 *Hand Ejector*.

Model D-20 is made for the following revolvers in 2 $\frac{1}{2}$ ", 3", 3 $\frac{1}{2}$ " & 4" barrel lengths: COLT'S .38 *Police Positive Special*, *Police Positive*, *Cobra*, .32 *Pocket Positive*, *Courier*, SMITH & WESSON'S *Chief's Special* 3", *Regulation Police*, .32 *Hand Ejector*, WEBLEY & SCOTT .38.

Model D-38 is for COLT'S *Official Police*, *Marshal*, and SMITH & WESSON'S *Military & Police*, all with 2" or 4" barrels.

Colt's *Detective Special* shown in holster.

The favorite off-duty holster of countless New York City policemen, the Hold-Out Inside Holster is long-wearing and economical. This concealing holster is easily snapped on and off the belt. It is sturdy and durable because of its one-piece construction and heavy duty snap. Made of finest quality top-grain cowhide, the Hold-Out is double-sewn with heavy nylon cord. This holster is made to be worn on a 1" belt.

G-2 DEFENDER

The Defender Inside Holster is the only practical concealment sheath for the Colt's *Government Model .45 Automatic Pistol*, the *Super-38*, and the *9mm. Commander*, as well as for S&W's new *9mm automatic*. This holster is preferred by pilots, tank-men and G.I.'s who wish to be unobtrusively armed in hostile or occupied territory. The weapon is held so close to the body that it allows the wearer to get in and out of tight places in a hurry, making it less likely for a gun carried in a Defender holster to become fouled on brush or barbed wire.

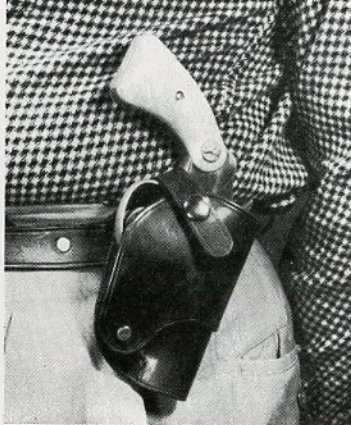

This holster is made to be worn on a $1\frac{1}{4}$ " belt.

G-2 DEFENDER

This holster is also available for most medium frame .32, .380, 7mm, and 9mm automatics. A smaller model is also made for most .25 cal. automatics, and for the Remington .41 *Over & Under Derringer* pistol.

Colt's *Government Model .45 Automatic* shown in holster.

Q-1 COMET 2"

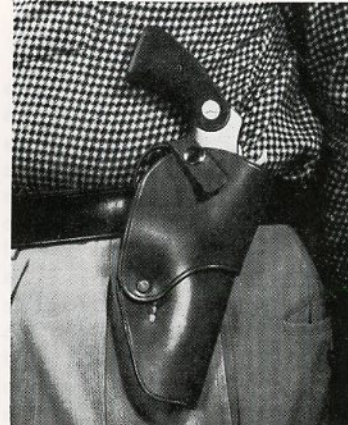

Colt's Detective Special shown in Comet 2".

Q-2 COMET 4"

Colt's Police Positive Special shown in Comet 4".

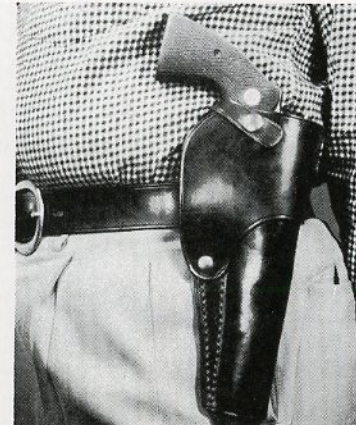

(The above holsters have patents pending)

Q-3 SHOOTING STAR

Colt's Marshal shown in Shooting Star.

(The above holsters have patents pending)

Q-4 DRAGOON

Colt's .357 shown in 6" Dragoon.

The Comet, Shooting Star, and Dragoon crossdraw holsters are the safest and fastest across-the-body-draw rigs available today. The two-piece pivoted construction of these holsters provide perfect protection for the delicate adjustable rear sights found on so many fine guns today. The extra-wide bottom scabbard accommodates any high front sight and is boned to increase the speed of draw. The butt of the gun is angled back and up into the body for greater comfort and concealment. All of these holsters are ideal for plainclothes use. The

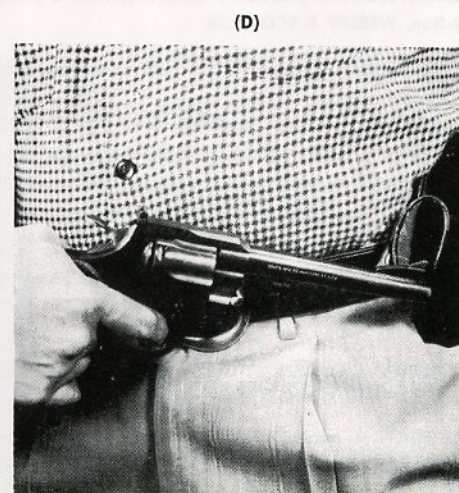

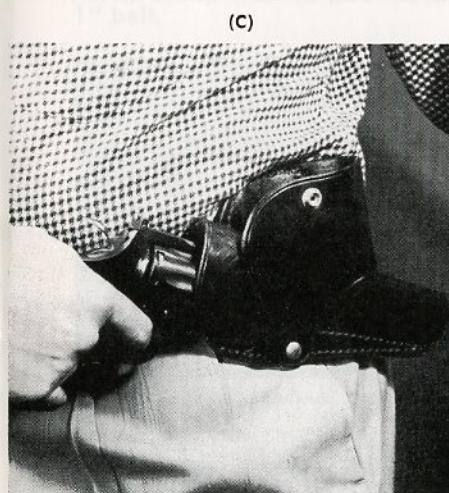

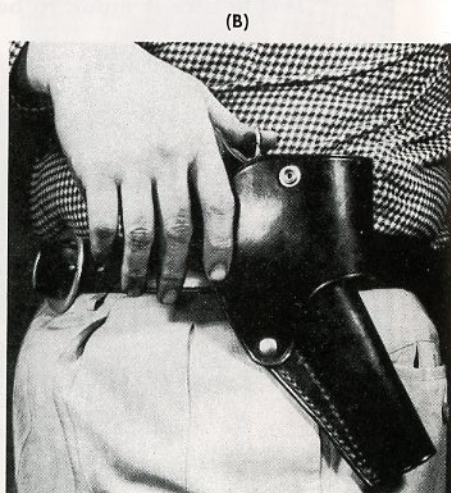

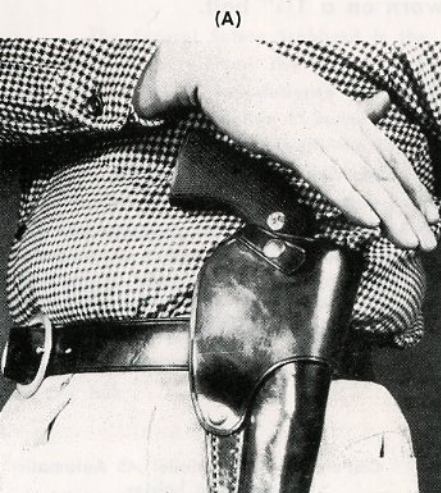

Dragoon is the only practical holster for all of the long-barreled heavy frame revolvers. Even S&W's .357 Magnum with the 8 $\frac{3}{8}$ " barrel can be drawn with amazing speed from this holster. The Dragoon is made to be worn on belts of from 1 $\frac{1}{2}$ " to 3" in width as specified. The Shooting Star should be worn on a 1 $\frac{1}{4}$ " or 1 $\frac{1}{2}$ " belt. The Comet is carried on a belt 1" or 1 $\frac{1}{4}$ " wide. Both the Comet and Shooting Star are available with super-safe snap-on belt loops which allow these holsters to be snapped on and off your belt in a jiffy.

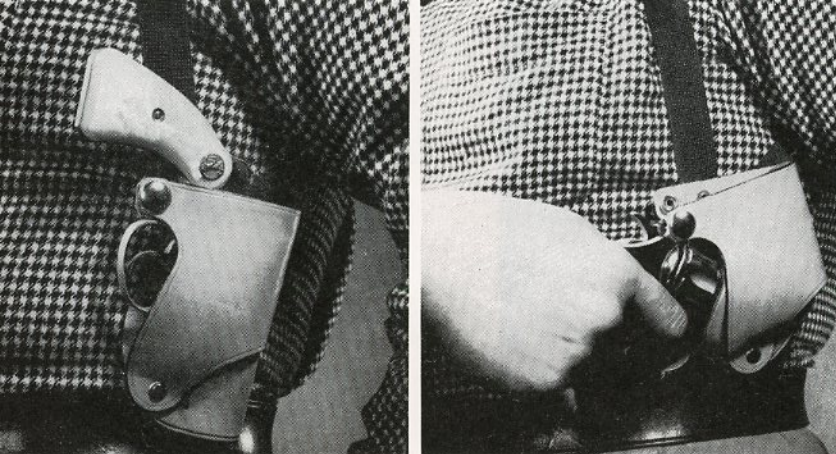

For a listing of the guns fitting the above holsters, please see the following page.

RECOMMENDED QUICK-DRAW METHOD TO BE USED WITH THESE CROSS-DRAW HOLSTERS

A. Twist your body quickly to the right as your hand passes beyond the holstered weapon in the first phase of a smooth continuous motion. B. Bring your extended hand back across the holster in a swiping motion, your fingers releasing the retaining strap as the heel of your palm pushes the butt of the gun, causing it to drop down into your hand with the trigger

guard exposed. C. As you grip the gun, twist your body back again towards the left, carrying the holster away as you draw the weapon from it. D. When the holster has cleared the gun, your weapon is already pointed in the direction towards which you are shooting. A few minutes daily practice in this method will make any shooter an exceptionally fast man on the draw!

Colt's Detective Special shown in holster

(Patent Pending)

B-1 BLUE STREAK

Faster than the fastest, the Blue Streak is far lighter in weight, as much less bulk, is more concealing and, without doubt, is far more comfortable than any shoulder holster you have ever worn. This "directional draw" holster is made for small frame revolvers only, in 2", 3" & 4" length barrels.

This holster is made for the following revolvers having 2" barrels: COLT's .38 Detective Special, Cobra, Banker's Special, Police Positive, SMITH & WESSON's .38 Chief's Special, Centennial Model, Terrier, Regulation Police, .32 Hand Ejector, .22/.32 Kit-Gun.

Another Blue Streak holster, Model #B-2 is made for the following revolvers in 2½", 3", 3½" & 4" barrel lengths: COLT's .38 Police Positive Special, Police Positive, Cobra, .32 Pocket Positive, Courier, SMITH & WESSON's Chief's Special 3", Regulation Police, .32 Hand Ejector, .22/.32 Kit-Gun, WEBLEY & SCOTT .38.

Gun List for Pages 8 and 9

Model D-1 is made for small frame revolvers with 2" barrels. COLT's .38 Detective Special, Cobra, Police Positive, Banker's Special, SMITH & WESSON's Chief's Special, Centennial Model, Terrier, .32 Hand Ejector and .22/.32 Kit-Gun.

Model D-2 is made for the following revolvers in 2½", 3", 3½" & 4" barrel lengths: COLT's .38 Police Positive Special, Police Positive, Cobra, .32 Pocket Positive, Courier, SMITH & WESSON's Chief's Special 3", Regulation Police, .32 Hand Ejector, .22/.32 Kit-Gun and WEBLEY & SCOTT .38.

Model D-3 is made for COLT's Official Police, Marshal, SMITH & WESSON's Military & Police, Combat Masterpiece, K-22, K-38 and .22 Masterpiece.

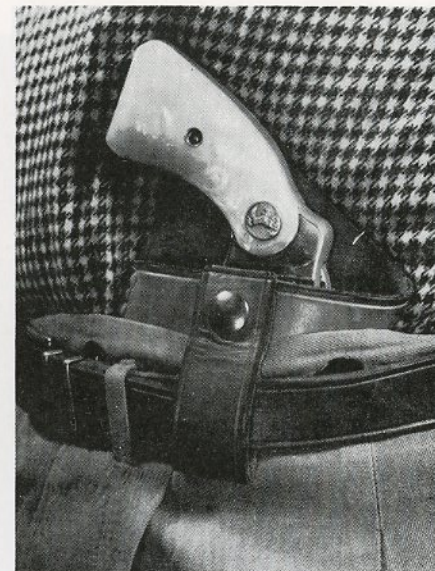

Model D-4 is made for heavy frame revolvers with 3½", 4", 5", 6", 6½", 8¾" barrels: COLT's .357, New Service, Model 1917 .45 ACP, Officer's Model Match Target, Trooper, SMITH & WESSON's .357 Magnum, .44 Special, .38/.44, Outdoorsman, 1917 .45 ACP.

G-1 SNEAKY PETE

Favored for its superior concealment by many C.I.D. men and Federal agents working undercover, the Sneaky Pete is designed to hide a weapon more comfortably and effectively than any other "inside-the-pants" holster yet devised. It is boned on the inside to increase the speed of draw. The Sneaky Pete can be worn on either side of the body in whatever position desired. An extra-heavy duty snap-on belt loop allows the holster to be put on or off the belt in a jiffy. This holster is designed to be worn on belts between 1" and 1½" in width.

Colt's Detective Special shown in holster

Made for COLT's Detective Special, Banker's Special, Police Positive, Courier and .32 Pocket Positive. SMITH & WESSON's Chief's Special, 2" & 3" and cut-down Regulation Police.

D-1 GUARDIAN

The safest holster possible, the Guardian Inside Holster is preferred by detectives and plainclothesmen in "trouble" areas. The Guardian is made of heavy top-grain cowhide sewn in double seams with extra-strong nylon cord. The super-safe snap on the belt loop will open only by applying pressure on the extended tab. Pressure on the belt will not release the snap. The cylinder-lock prevents the weapon from being drawn unless the wearer disengages the catch with thumb pressure against the cylinder lock while the revolver is being drawn. This holster combines both comfort and concealment and is made to be worn on a 1" belt.

Made for small frame revolvers with 2" barrels. COLT's .38 Detective Special, Cobra, Police Positive, Banker's Special, SMITH & WESSON's Chief's Special, Centennial Model, Terrier, and .32 Hand Ejector.

Model D-10 is made for the following revolvers in 2½", 3", 3½" & 4" barrel lengths: COLT's .38 Police Positive Special, Police Positive, Cobra, Courier, SMITH & WESSON's Chief's Special 3", Regulation Police, .32 Hand Ejector and WEBLEY & SCOTT .38.

Model D-41 fits COLT's Official Police, Marshal and S&W's Military & Police, all with 4" or 2" barrels.

Colt's Detective Special shown in holster

P-1 SENTINEL

(Patent Pending)

The fastest, safest, most comfortable and practical uniform holster for police service revolvers, the Sentinel Police Holster was designed to meet the needs of the present day law enforcement officer. Whether the wearer is sitting at a desk, cruising in a prowl-car, pounding a beat or standing guard on post, the holster holds the peace officer's gun ready for instant use in case of emergency. The downward pivoting action provides a lightning-quick "shooting-grip" on the gun. This holster is designed to be worn with a 2" belt.

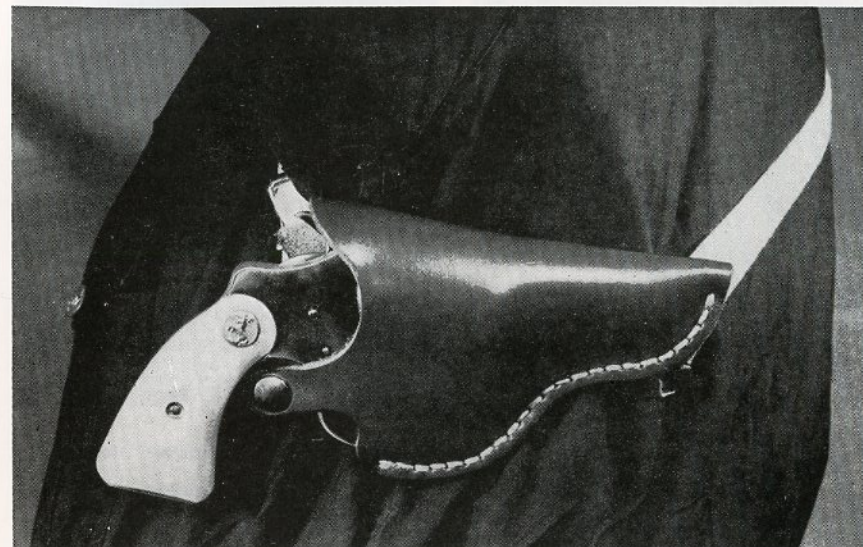

Colt's Official Police shown in holster

Made for COLT's Official Police, Marshal, SMITH & WESSON's Military & Police and Combat Masterpiece 4" barrels. MODEL P-2 for COLT's Official Police & S&W's Military & Police with 5" barrels.

(From "Weapon - Wise" by David O. Moreton, in the April 1955 issue of LAW and ORDER, the Independent, Professional Magazine for All Concerned with the Business of Law Enforcement.)

"Not too long ago I had the opportunity to drop into the West Side shop of Chic Gaylord at 312 West 47th Street here in New York. Chic Gaylord makes pistol and revolver holsters. His holsters are of top quality leather and quality workmanship, each of his hand fitted holsters exhibits personal pride in doing a fine job. One feature that I noted almost at once was that Chic uses quite heavy Nylon thread instead of the usual waxed Linen. Nylon is stronger and will not rot from perspiration.

A most important feature I believe is that these holsters are possibly the fastest in the business, attesting to this fact is that a great number of Federal Agents are equipping themselves with Gaylord Holsters. These holsters have impressed me so much that I plan to do a series of photographs showing the various models Gaylord makes, in action. There have been several instances where agents can be grateful to Chic's fast drawing holsters for saving their lives in a tight pinch, the reason for rating them as so important."

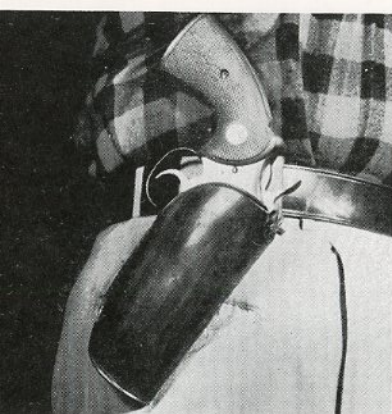

H-1 DYNAMITE

This super-fast, "Directional Draw" holster was designed for small frame revolvers having 2" barrels and small grips (will not fit revolvers having grip adapters or magna-type stocks). It is exceptionally concealing and very comfortable. Its design allows the wearer to get a proper shooting grip on the gun instantly. The Dynamite is made of top-grain cowhide sewn with heavy nylon cord and boasts harness tapes made of extra-strong, lightweight nylon webbing.

Made for S&W Chief's Special, Terrier and .32. It is also recommended for COLT's .32 Pocket Positive.

(Excerpt from Stan Smith's "Woods and Waters" column in the NEW YORK DAILY NEWS, October 12th, 1953)

". . . First, Gaylord's holsters are inexpensive, Second, they're the best we've ever seen. Of prime consideration for G-Men, Treasury agents and detectives is a hi-rise or quick draw holster. The sportsman, on the other hand, needs only a holster that will house his sidearm. Either way,

Colt's .357 with 4" barrel
shown in scabbard.

X-1 .357 SCABBARD

The .357 Scabbard is an extremely fast, compact, hip holster for heavy frame revolvers with barrels of 4" or less. It is made of heavy top-grain cowhide, formed and double sewn with heavy nylon cord. This scabbard is boned and comes in antique brown finish. It can be worn on a 1½" belt.

Colt's 9mm Commander
shown in holster

Y-1 MEXICAN DEFENSE MATCH

The Mexican Defense Match Crossdraw holster was designed to provide the fastest draw possible with a semi-automatic pistol. The sturdy one-piece construction holds the weapon rigidly when worn on a 1½" belt. Double sewn with heavy nylon cord, the holster is formed to the shape of the gun and is boned to increase the speed of draw. The Mexican Defense Match is made for the COLT Government Model .45 Automatic, COLT's Ace, COLT's Super .38, COLT's Commander and S&W's 9mm automatic.

Dr. Robert Abels, internationally recognized authority on antique firearms, writes:

"Gaylord's inside holster for the Chiefs Special is the most practical holster made, for concealment and comfort. I have found my Remington-Union Square holster most satisfactory."

Ruger "Single-Six" shown in holster

F-1 MISSOURI SKINTITE

Designed and made in the best tradition of the Old West, the Missouri Skintite is a true cut-down gun-fighter's rig. This is a holster reduced to the bare essentials. It is extremely fast when worn on a snug 1½" belt. This scabbard is made for the RUGER "Single-Six" .22, COLT's .38 Lightning, and COLT's .45 single-action Frontier six-shooters having barrels 5½" or less.

All GAYLORD HOLSTERS are formed and fitted in our workshop and are shipped to you in the condition in which they are to be used. Do NOT oil, wet or grease these holsters. To preserve the leather we recommend that they be polished occasionally with Esquire transparent wax polish.

All GAYLORD HOLSTERS designed as "Directional Draw" have been designed so that the weapon can be drawn and fired in one swift, smooth, uninterrupted motion.

For speed, comfort, concealment and best, all-around performance, we strongly recommend that GAYLORD HOLSTERS be worn on a firm, snug belt of the width specified for each model.

COLT revolvers shown in this brochure appear through the courteous cooperation of COLTS MANUFACTURING COMPANY, Hartford, Connecticut.

	for: Ruger .44 Magnum Blackhawk	
	with: retaining strap.....extra...	\$ 1.00
	A retaining strap for a rig this size is not recommended.	

The MISSOURI SKINTITE for Colt Single Action Revolvers is made with either a safety hammer lock or a retaining strap. We recommend the hammer lock which consists of a hammer strap designed with a hole into which the firing pin fits. With this hammer lock you can carry 6 shells safely in your Single Action. Your Colt will be secure and cannot be fired until manually cocked.

COLORS AND FINISHES

Models Q-1, Q-2, Q-3, & Q-4 are standard in a two-tone combination of Antique brown and natural cowhide, but may be ordered in solid Antique brown or natural cowhide at no extra charge. All holsters marked Antique brown are standard in that color but may be had in black at \$1.00 extra.

TERMS

Orders are placed in production only upon receipt of cash, money order or check. (Sorry no C.O.D.'s)... Prices for individual orders include postage at parcel post rates within the continental limits of the United States only. Please pay by money order on all orders outside of the USA and add an additional \$.50 for postage. If the package is over 8 ounces we will send a receipted bill before shipping your order for your use at your Customs Office.

INSTRUCTIONS FOR ORDERING

State make, model, caliber and length of barrel of gun. (The barrel of a revolver is measured from the forward face of the cylinder, to the tip of the barrel. Barrels of automatic pistols are measured from the breach opening to the muzzle.) State clearly the type of sights on the gun if they are other than standard for that make and model handgun. Describe fully the type of grips used, and if the weapon is equipped with magna type, target, or if grip adaptors are used. Describe any alterations in the trigger-guard, hammer (Target, cut-down, hump-back, etc.) or frame of the gun (Ventilated ribs, etc.)...
